

PETITION TO THE LEGISLATIVE COUNCIL OF VICTORIA AGAINST THE CLARINDA CONCRETE CRUSHER

The Petition of certain citizens of the State of Victoria draws to the attention of the Legislative Council that:

- (1) The Planning Minister Justin Madden & the Brumby Labor Government approved, **without consultation, a 15 year permit** for a concrete crusher in Clarinda;
- (2) The concrete crusher will be within **450 m of the nearest homes & in close proximity to several schools & pre-schools;**
- (3) Medical studies have found that prolonged exposure to concrete dust can be carcinogenic & **cause serious health complications for people with breathing disorders;**
- (4) The concrete crusher causes unacceptable off site impacts such as **dust which will spread** across nearby suburbs.

The petitioners call on the Victorian Legislative Council AND the Brumby Government **to protect our community from exposure to harmful concrete dust by taking action to relocate the concrete crusher facility to a Non Urban, Non Residential area.**
 The signatories below also call on the Minister for Planning, Justin Madden, to initiate legislative change to stop permits being given to other concrete crushers where such facilities can have a harmful effect on health and amenity.
